

Oppuna

Private mental wellness support,
offline on your phone.

kaushik Itagi · Founder · July 2026

The Problem

Mental wellness apps ask users to trade privacy for help.

- **1 in 4** people experience a mental health condition each year — yet most apps require accounts, cloud sync, and connectivity
- Users fear their **most vulnerable thoughts** being stored on corporate servers or leaked
- Cloud AI companions route intimate conversations through **third-party APIs**
- In **low-connectivity regions**, wellness apps simply stop working
- Privacy policies aren't enough — users want **privacy by architecture**

"I want help, but I don't want anyone else to know what I'm going through."

Product

One calm app. Eight wellness tools. Zero data leaving the phone.

AI Companion
Mood-aware offline chat with CBT & grounding

Crisis Safety
Local distress detection + regional helplines

Mood Tracker
5 moods, intensity, tags, weekly chart

Journal
Daily, gratitude, thought records, reflections

Breathing
4-4-6, box breathing, animated guide

Grounding
5-4-3-2-1 senses exercise

Sleep Support
Wind-down checklist + TTS narration

Voice Notes
Private audio stored locally

- 18 screens
- EN · ES · HI
- Dark / Light themes
- Biometric app lock
- Data export & delete

How It Works

Privacy by architecture, not policy.

Network Guard: blocks ALL outbound internet requests in production

1. Crisis Detection
Suicide, self-harm, abuse → dedicated crisis screen with helplines

2. On-device LLM
Optional GGUF model via llama.rn with validated responses

3. Rule Engine
Deterministic CBT/mindfulness fallback — always available

Market Opportunity

A large, fast-growing market with a trust gap.

- **Asia-Pacific** is the fastest-growing region — India is a key initial market
- Employer wellness programs and digital health adoption accelerating globally
- AI-driven therapy creates demand — but also **privacy backlash**
- **Oppuna's wedge:** privacy-conscious users + low-connectivity markets

Competitive Landscape

Architectural privacy is hard to retrofit onto cloud-first apps.

	Oppuna	Calm / Headspace	Woebot / Replika	Day One
Fully offline	✓	✗	✗	Partial
No account	✓	✗	✗	✗
AI companion	✓ on-device	✗	✓ cloud	✗
Crisis safety	✓ local	Limited	Cloud	✗
Data stays on device	✓	✗	✗	✗

Traction & Status

Production-ready v1.0 — ready to launch.

- **v1.0.0** built and feature-complete
- **Android AAB** signed, ready for Google Play
- **EAS pipeline** configured for production builds
- **18 screens** across full wellness feature set
- **Unit tests** for AI engine, crisis detection, DB
- **Privacy site** live on GitHub Pages

Pre-launch

No user metrics yet — by design.
We collect zero telemetry.
The product is real and shippable today.

Roadmap

Built to grow without compromising privacy.

Q3 2026 Launch Google Play + App Store release	Q4 2026 v1.1 On-device LLM, SQLCipher encryption, biometric lock	Q1 2027 v1.2 Speech-to-text, 5+ languages	Q2 2027 v2.0 Premium tier, advanced insights, wearables	H2 2027 B2B Employer wellness pilots, NGO partnerships
--	--	---	---	--

The Ask

Pre-seed round to launch and reach product-market fit.

\$500K – \$750K

Use of funds	%
Launch & growth	35%
Engineering (LLM, encryption, STT)	30%
Clinical & safety	15%
Operations & legal	10%
Runway buffer	10%

18-month milestones

50K+ downloads

Premium conversion ≥ 5%

1–2 B2B / NGO pilots

On-device LLM shipped

Why Now, Why Oppuna

- **On-device AI is viable** — small GGUF models run on modern phones today
- **Privacy regulation is tightening** — policies alone aren't enough
- **Mental health demand is surging** — but trust in cloud apps is eroding
- **India + APAC are underserved** — Hindi support, local crisis helplines, offline-first
- **Oppuna is built** — v1.0 is production-ready, not a concept

**Peace of mind.
On your terms. Offline.**
